

DURING SCHOOL - BEFORE & AFTER SCHOOL

During school, parents can trust the school IT infrastructure and IT personnel managing the children's internet use.

But what happens before and after?

Studies have proven parental engagement leads to:

- Higher Academic Achievements
- Greater Performance
- Reduced Distraction
- More Receptive
- Reduced Temptation
- Increased Communication
- Increased Self-Compliance
- Decreased Bullying
- Increased Attendance

Visible Internet is designed to assist parents to:

- Engage** with their children regarding their internet use;
- Create greater **visibility** of the child's internet activities; and
- Assist in **guiding** them appropriately as they would in a non-technology environment.
